Power Generation Solutions

**For Boiler Maintenance,
Turnarounds, Capital
Work & Emergencies**

Total Access & Industrial Service Solutions

Award-winning safety. The largest in-house Research, Development and Engineering Department. A powerful project management system. More locations and inventory than anyone else. When you boil it down, Safway's access, insulation and coatings solutions mean boiler maintenance, repair and capital projects are completed faster, safely and at the lowest installed cost – THE SMART WAY™.

Access for Every Boiler Project

Wall Tubes and Panels

When water wall tubes and panels need to be replaced or repaired, Safway can provide quick, safe access, while reducing downtime. For concentrated jobs – those in a targeted or isolated area – QuikDeck® is ideal and eliminates the need for a full scaffold buildup. If tubing work is the only maintenance required, Swing Stages are great for focusing on a specific area. For major water wall tube work or a full boiler blast, Safway's Systems™ Scaffold can safely and efficiently provide complete access.

Burner Replacement

If access to burners is needed, for repair or replacement, Safway's Systems Scaffold is the best solution. Systems Scaffold gives contractors access to walls, as well as the lower portion of the boiler, in the tough-to-reach places.

Superheater Work Covered

Superheater work can require

access to a number of areas, mostly above the bull nose. By using QuikDeck Safway can provide access to a boiler's superheaters, without building scaffold from the base, significantly reducing schedules and labor costs. For tight spots, Safway has a variety of tubes and clamps that can fit through virtually any access point. Our Tube & Clamp Scaffold can also be used simultaneously with QuikDeck for a platform and scaffold buildup above the bull nose.

Motorized Solutions

Safway has an exclusive, dedicated Motorized Division. When a simple inspection is in order, our SafAscent™ Swing Stages provide complete mobile wall access easily and quickly. We also have our complete line of SafRise™ Mast Climbers and SafTran™ Transport Platforms designed for fast, safe access.

Environmental Retrofits

Retrofitting your boiler can be a major undertaking, requiring a

complex scaffold structure, large labor field and access to difficult burner mounting angles. Systems Scaffold is ideal for these situations. For jobsite adjustments, Systems can have its horizontal and diagonal members individually removed and placed after erection. In addition, unlike many other scaffold designs, Systems features a seven-foot clearance between deck levels, allowing contractors a safer, more convenient work area.

Insulation Done Right

Whatever the insulation needs are at your power plant, Safway has it covered. With more than 20 years of experience, Safway insulation experts are dedicated to safety, quality, reliability and energy efficiency. Our comprehensive insulation services include:

- Energy Appraisals
- Insulation Solutions
- Metal Sheeting
- Metal Siding and Roofing
- Fireproofing
- Customized Insulation Blankets

High-Quality Coatings

Known for outstanding customer service, Safway Group companies specialize in the application of high-quality coatings. We have established a record of performance, quality work, safety and regulatory compliance. Our coatings products and services include:

- Surface Preparation
- Spray and Trowel On Fireproofing
- Tank Coatings and Linings
- Coating Programs
- Lead Abatement
- Floor Coating Systems

Safety is Number One

At Safway, Environmental Health and Safety (EHS) is our number one value. It's a basic right, and our first and foremost responsibility is protecting our workers, along with everyone working with our products and services.

Safway has an outstanding track record in safety, and we can

provide onsite expertise to assist in field management, including assurance of OSHA, Cal/OSHA and OH&S compliance. In addition, we are the only company with our own Training University and are able to provide Site Safety Professionals, who receive support from our safety team. We are committed to maintaining and continuously improving our safety performance – setting the standard in our industry.

We believe that safety drives efficiency and productivity. The equation we like to use is SAFETY + EFFICIENCY = PERFORMANCE + PRODUCTIVITY. Bottom line: the safest company will also deliver the best quality and performance at the lowest total installed cost.

**SAFETY
+ EFFICIENCY =**

**PERFORMANCE
+ PRODUCTIVITY**

“We know Safway has the right equipment, and we know they have the design (engineering) services we need for an environment like this.”

Products

Systems™ Scaffold

Systems™ Scaffold is one of the most versatile scaffold products ever developed and was specially designed to meet the vigorous, unique challenges of boiler work.

Systems™ Scaffold has passed all seismic qualification tests of Class 1E equipment in May 2010 and is in full compliance with ANSI and IEEE standard 344-1987.

The scaffold's seismic test input was 10 percent greater than any other known seismic qualification test of scaffold in its class, further proving its strength.

Motorized Solutions

Safway's comprehensive Motorized Division offers a full-line of products. Our heavy-duty SafAscent™ Swing Stages easily adapt to smaller spaces. We also have a complete line of SafRise™ Mast Climbers and SafTran™ Transport Platforms for quick, easy and safe access.

The Safway Advantage

Versatile products and services is only part of the Safway advantage. We provide the planning, processes, technology and people to make every project a success from start to finish. Safway Group offers several contract options – including performance contracts – where we share in the risks with you. We have more inventory and locations; an in-house staff of licensed civil, structural and mechanical engineers supported by state-of-the-art 3-D Computer-Aided Design (CAD) and structural analysis software; SafScan™ HD Laser Surveying; and the Safway Tracking System (STS), the most robust project management tool in the industry, which provides complete cost transparency.

Let Us Partner With You

By combining Safway's extensive resources, together with our expertise and experience, we can work with you as a strategic partner, developing and implementing innovative and highly efficient access solutions. We look forward to partnering with you on your next project.

Start at the Top

Get to boiler repairs and maintenance faster with the QuikDeck® Suspended Access System.

- 1 Components break down to fit through narrow openings.**
 - 15" depth of section truss (nominal)
 - Components break down to fit through narrow openings
 - Efficient product design can mean lowered material costs
- 2 Build platforms "in the air" from access hatches.**
 - Ease of assembly can reduce installation time and help decrease downtime
 - Use as vertically traveling platforms for access wherever the project calls for it
- 3 Solid platform gives workers sturdy surface to work on.**
 - Solid platform decreases chance of falling equipment, debris or tools and is safer for workers below
 - Additional Systems™ Scaffold can be erected on the platform
