12 DAYS FASTER

Using our QuikDeck® Suspended Access System, BrandSafway slashed 12 days off a boiler shutdown.

QuikDeck® eliminates the time needed to build scaffold from the bottom up, while enabling multiple trades to work on various levels and side-by-side on a safe, suspended floor. Benefits like these helped us put a Michigan boiler project more than a week and a half ahead of schedule.

Find out how QuikDeck can reduce timelines and maximize efficiency, so you can complete your next project faster, safer and better.
